- U.S. FDA cleared
- Portable, customized for personalized beauty (upper face/jawline/neck/hands)
- Simultaneously outputs 4 channel groups

Bio-Trim

Multi-frequency Microcurrent

Daily care

Anti-aging

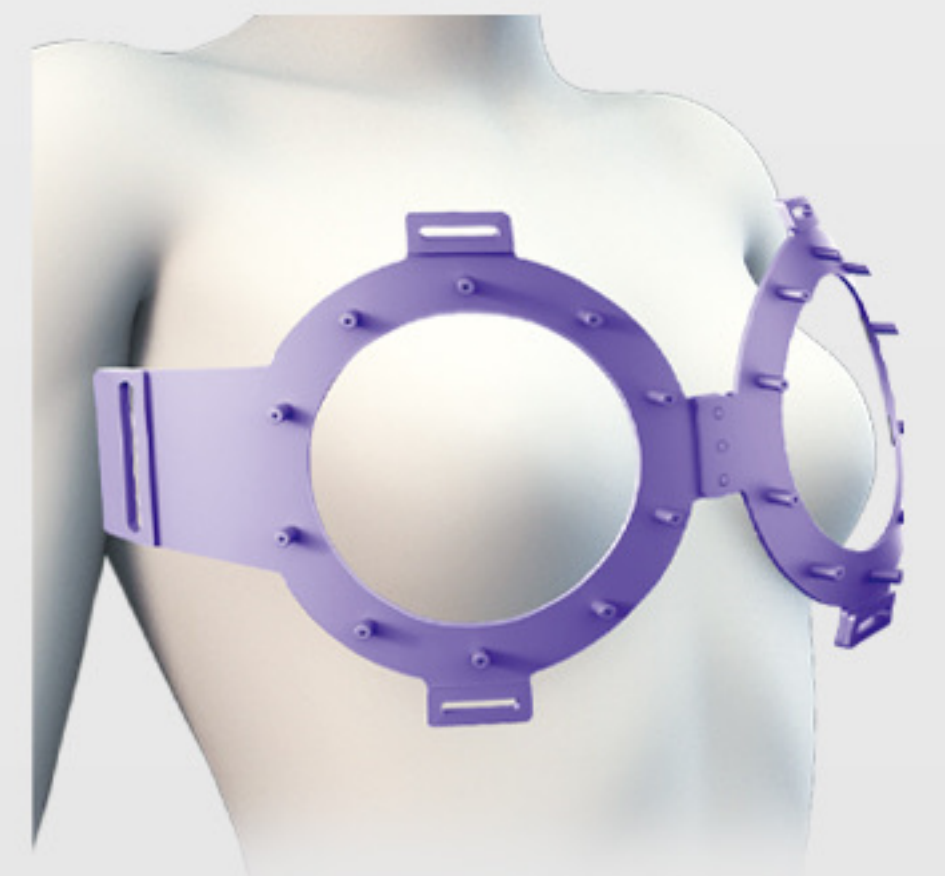

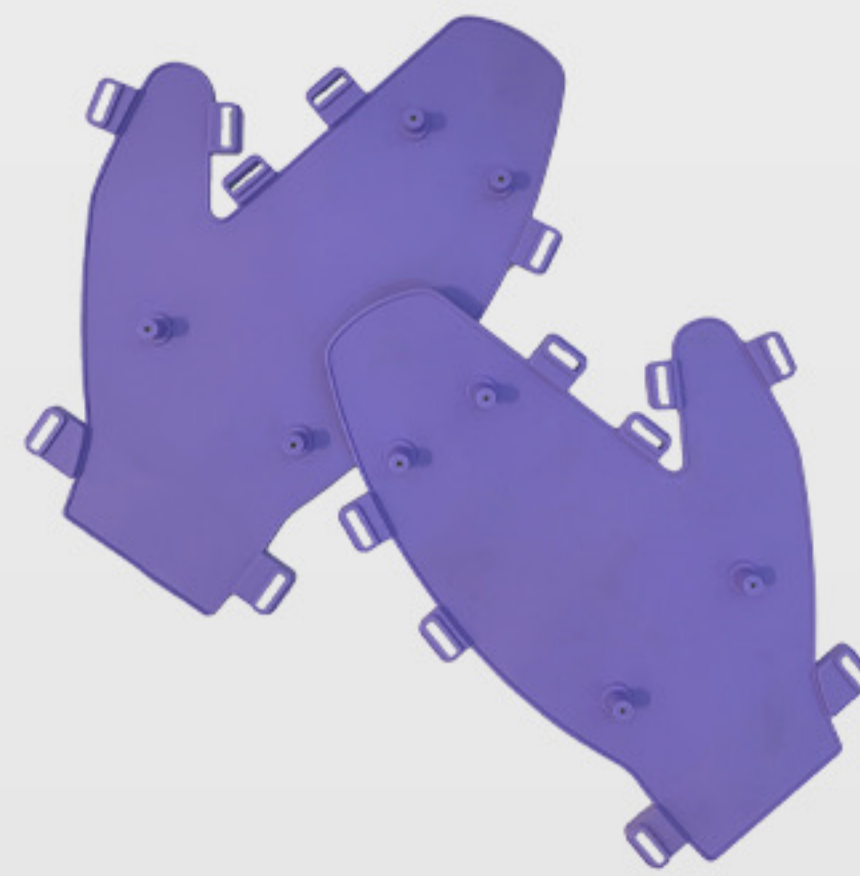

Post treatment

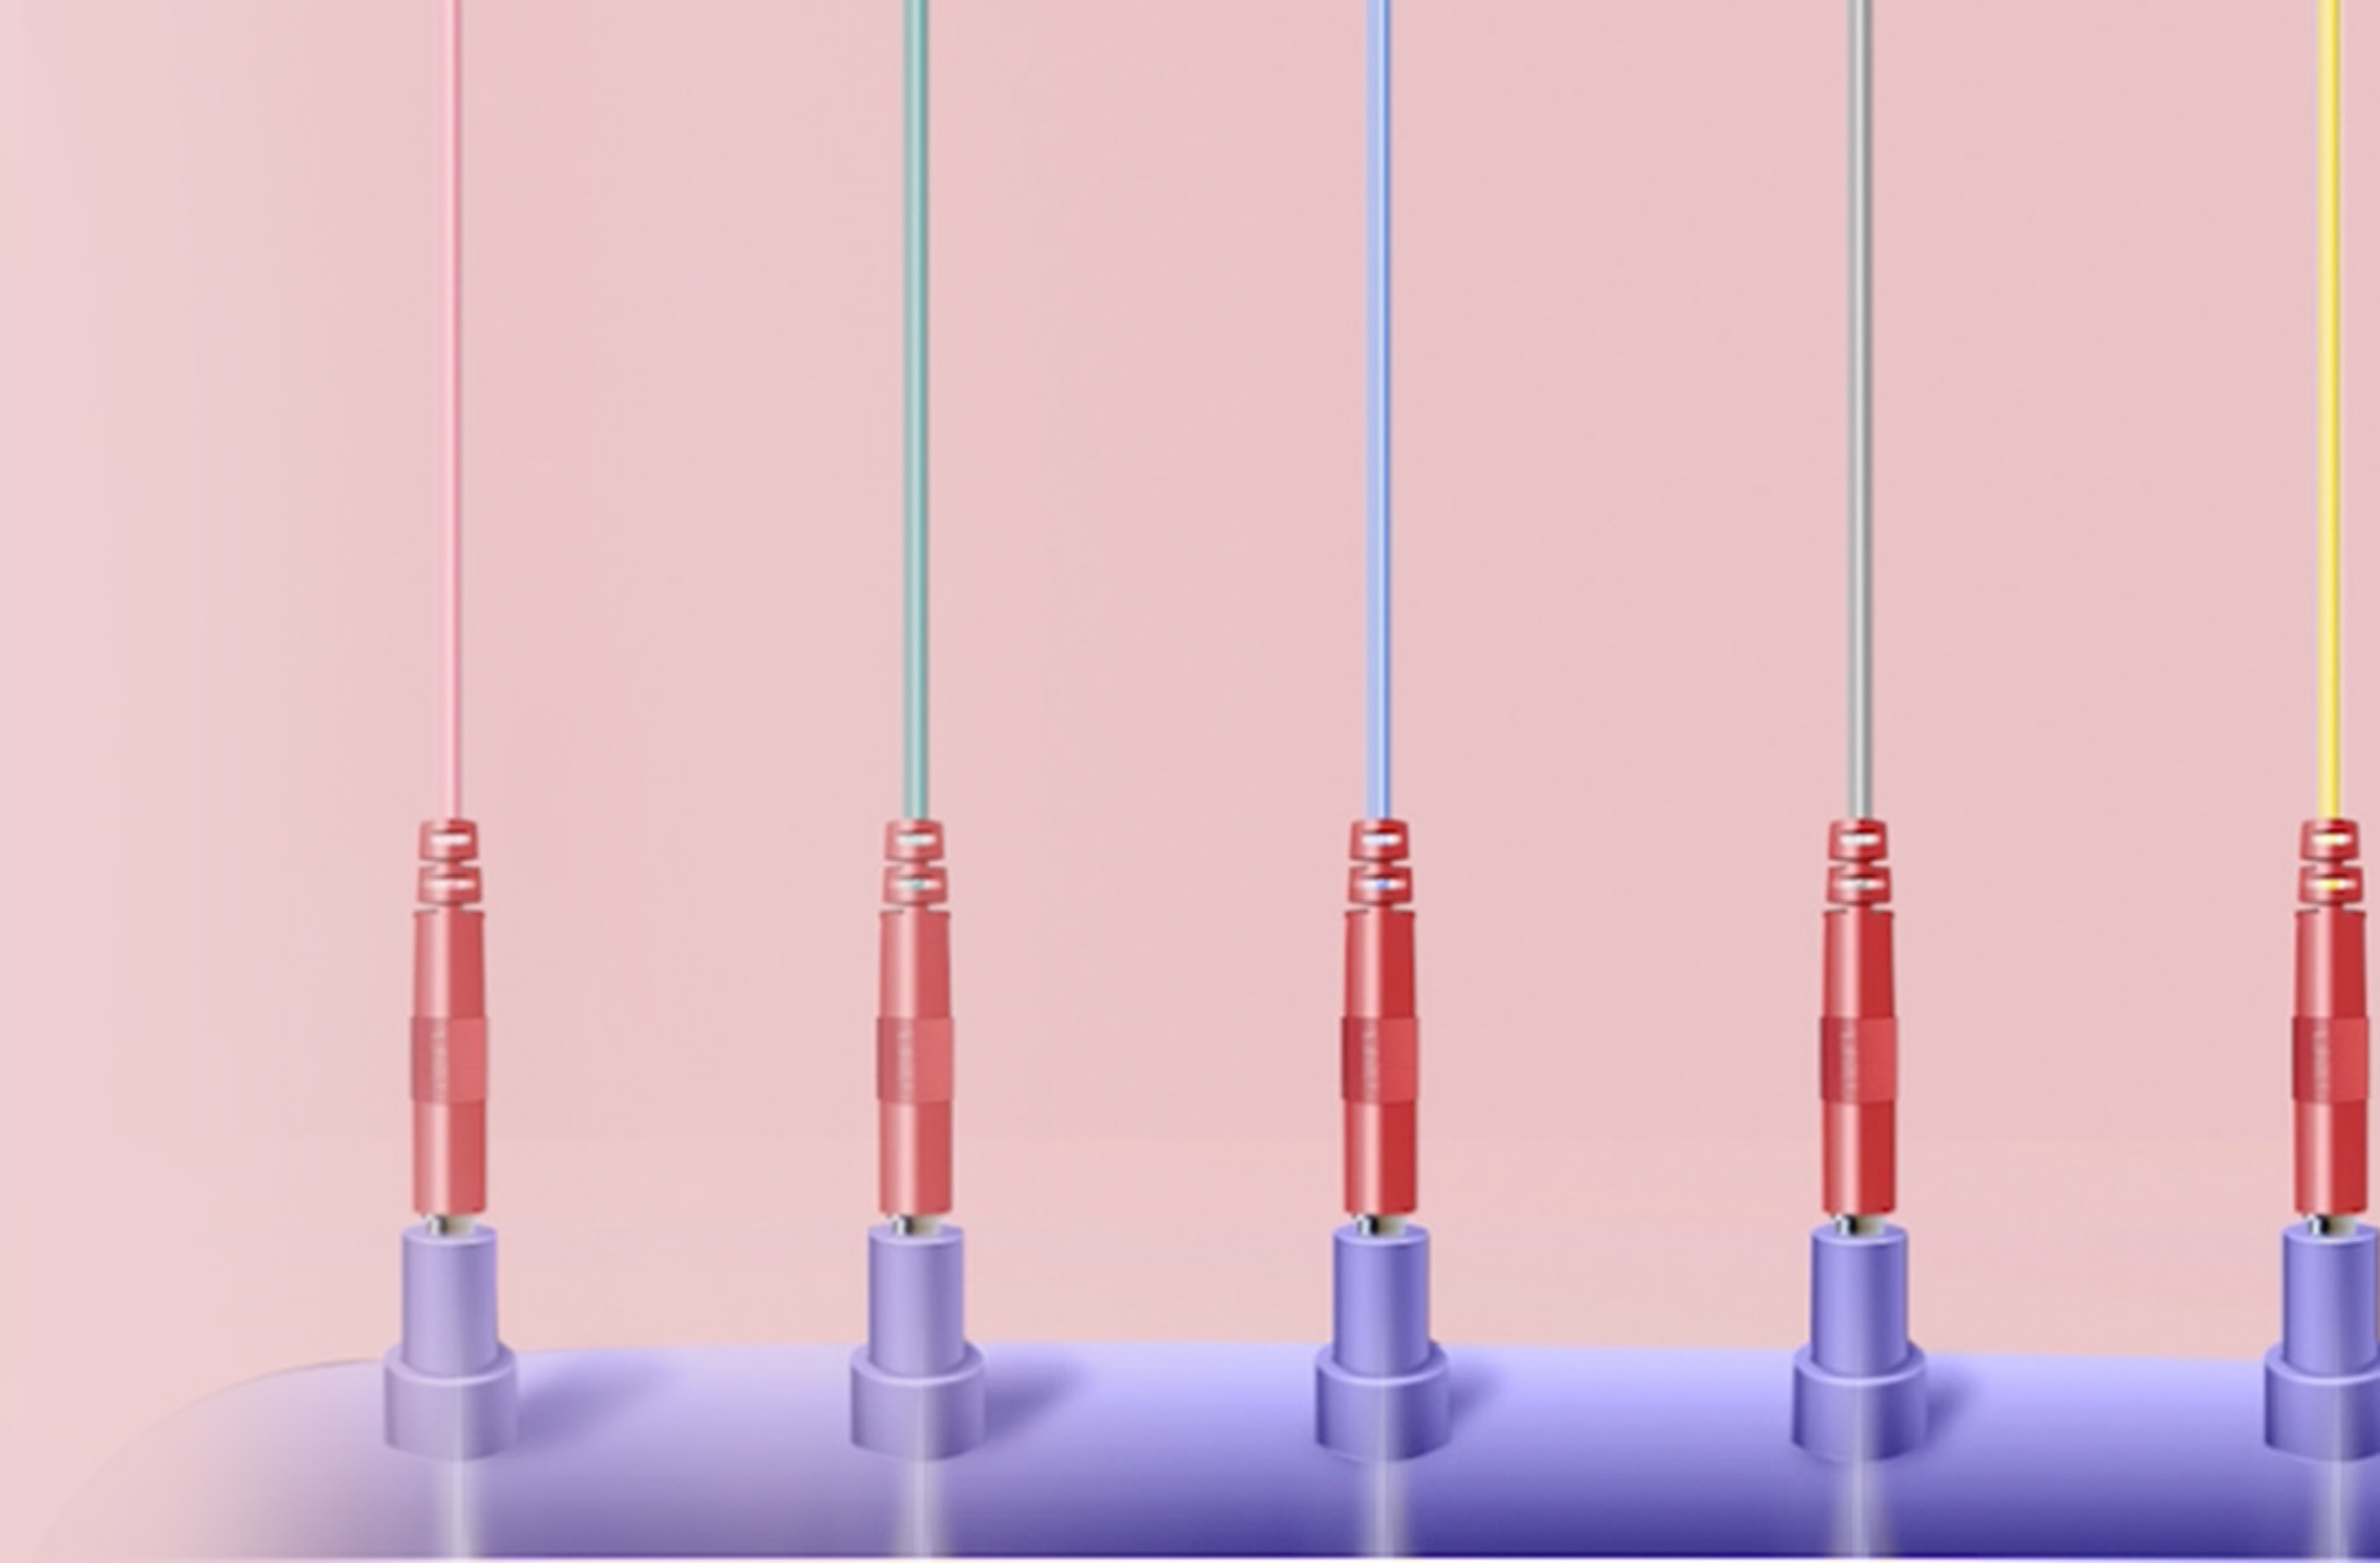

Enhance the absorption
of skincare products

Exclusive aesthetic mask

Different cells/levels/areas
Simultaneous synchronized
precise anti-aging

The UIC Beauty and Body Series products utilize simulated human bioelectric currents.

Experimental data from the University of Washington in the United States show that they have the following effects on cells:

- The production of ATP by cells increases by 500%.
- The amount of amino acids entering cells through active transport increases by 30%-40%.
- Protein synthesis in cells increases by 70%.
- Collagen production increases by 14%.
- Elastin production increases by 45%.
- Blood circulation in local tissues increases by 39%.
- Cellular transport (cell permeability) increases by 40%.
